

20-Minute Presentation: Strategy to Increase BrightTV Subscriptions

Executive Summary

BrightTV has **4,386 subscribers** generating **1,523 hours** of viewing across **10,000 sessions** in Q1 2016. However, **78% of subscribers are at risk** with very low engagement (1-2 days of activity), representing a massive retention and growth opportunity.

Platform Overview - Q1 2016				
Total Subscribe...	Total Sessions	Total Hours Watched	Avg Session (hr...	Channels Available
4,386	10,000	1,523.0	0.15	21

1. The Engagement Crisis (Slides 1-3, ~5 minutes)

Critical Finding: 78% of Subscribers Are Disengaged

Our subscriber base shows alarming engagement patterns:

- **Very Low Engagement (3,438 subscribers, 78%):** Only 1.3 days active, 0.21 hours total viewing
- **Low Engagement (832 subscribers, 19%):** 3.8 days active, 0.71 hours viewing
- **Medium Engagement (105 subscribers, 2.4%):** 8.5 days active, 1.64 hours viewing
- **High Engagement (11 subscribers, 0.3%):** 18.2 days active, 3.07 hours viewing

Churn Risk Analysis

2,480 subscribers (57%) watched only one day and then never returned, averaging just 0.16 hours. Another 958 (22%) watched only two days. Only 948 subscribers (22%) became multi-day users, but they watch 5x more content (0.84 hours vs 0.16 hours).

Key Insight: The first 48 hours are critical. If we can convert single-day users to multi-day users, we could increase total viewing hours by 400%.

2. Growth Momentum (Slides 4-5, ~3 minutes)

Strong Month-over-Month Growth

Subscriber acquisition is accelerating:

- **January:** 1,167 unique subscribers
- **February:** 1,500 subscribers (+29%)
- **March:** 2,549 subscribers (+118% vs Jan, +70% vs Feb)

Opportunity: We're successfully acquiring subscribers, but failing to retain them. Focus must shift from acquisition to activation and retention.

3. Content Strategy Insights (Slides 6-8, ~4 minutes)

Top Performing Content

Sports content dominates engagement:

- **ICC Cricket World Cup 2011:** 1,054 subscribers, 412 hours (27% of all viewing)
- **Supersport Live Events:** 1,164 subscribers, 313 hours (21% of all viewing)
- **SuperSport Blitz:** 731 subscribers, 91 hours

Entertainment channels show strong reach:

- **Channel O** and **Trace TV:** 739 and 724 subscribers respectively, 192 hours each
- **Cartoon Network** and **Boomerang:** 660 and 561 subscribers, targeting family audiences

Recommendation: Sports content, especially cricket, is the primary driver. Promote live sports events heavily in onboarding and marketing.

4. Audience Targeting (Slides 9-11, ~4 minutes)

High-Value Demographics

Youth males dominate the platform:

- **Youth males:** 2,131 subscribers (49% of identified demographics), 803 hours
- **Adult males:** 1,208 subscribers (28%), 435 hours
- **Youth females:** 293 subscribers (7%), 75 hours

Geographic Concentration:

- **Gauteng:** 1,607 subscribers (40%), 554 hours
- **Western Cape:** 770 subscribers (19%), 300 hours - **highest engagement per subscriber** (0.39 hrs)
- **Eastern Cape:** 271 subscribers but **highest per-subscriber engagement** (0.43 hrs)

Opportunity: Western Cape and Eastern Cape show higher engagement despite smaller subscriber bases. These regions may have better content-market fit or less competition.

5. Viewing Behavior Patterns (Slides 12-13, ~2 minutes)

Peak Engagement Windows

Afternoon viewing dominates:

- **Afternoon (3pm-6pm):** 647 hours (42% of total), 2,463 unique subscribers
- **Morning (6am-12pm):** 474 hours (31%), 2,057 subscribers
- **Evening (6pm-12am):** 295 hours (19%), 1,611 subscribers
- **Midnight (12am-6am):** 107 hours (7%), 590 subscribers

Recommendation: Schedule promotional content and notifications during afternoon hours (3-6pm) when engagement is highest.

6. Actionable Recommendations (Slides 14-18, ~6 minutes)

Priority 1: Fix the Onboarding Crisis (Immediate - 30 days)

Problem: 57% of subscribers watch once and never return.

Solutions:

1. **Day 1 Welcome Campaign:** Personalized email/SMS within 2 hours of signup highlighting top 3 channels based on demographics
2. **Cricket-First Onboarding:** For male subscribers, immediately promote upcoming cricket matches and highlights
3. **48-Hour Activation Window:** Send targeted push notifications on Day 2 if no activity, offering "Top 5 Shows for You"
4. **First-Week Milestone Rewards:** Gamify engagement - "Watch 3 different channels this week, unlock premium content preview"

Expected Impact: Increase Day 2 return rate from 22% to 40% (+800 retained subscribers/month)

Priority 2: Content-Led Growth Strategy (30-60 days)

Leverage Sports as the Hook:

1. **Live Sports Alerts:** SMS/email notifications 30 minutes before major cricket/soccer matches
2. **Sports Bundle Promotion:** "Cricket Fan Package" - ICC World Cup + Supersport channels highlighted
3. **Event-Driven Campaigns:** Time marketing around major sporting events (World Cup, Premier League)

Expand Entertainment Reach:

1. **Family Packages:** Bundle Cartoon Network + Boomerang for households with children
2. **Music Channels:** Promote Channel O + Trace TV to youth demographic
3. **Content Discovery:** "Because you watched [Cricket], try [SuperSport Blitz]" recommendations

Expected Impact: Increase average channels per subscriber from 1.3 to 3.0 (+130% content discovery)

Priority 3: Regional Expansion Strategy (60-90 days)

Double Down on High-Engagement Regions:

1. **Western Cape & Eastern Cape Focus:** These regions show 13-24% higher engagement per subscriber
2. **Regional Content:** Partner with local sports teams, add regional language options
3. **Referral Programs:** "Bring a friend" incentives in high-engagement areas

Penetrate Underserved Markets:

1. **Limpopo & North West:** Lower engagement suggests content mismatch - conduct surveys
2. **Rural Connectivity:** Partner with ISPs to offer bundled internet + BrightTV packages

Expected Impact: 50% subscriber growth in Western/Eastern Cape (+500 subscribers), 20% engagement lift in underserved regions

Priority 4: Retention & Engagement Programs (Ongoing)

Multi-Day User Conversion:

1. **Week 1 Challenge:** "Watch 5 days this week, get 1 week free premium"
2. **Viewing Streaks:** Gamification - "7-day streak unlocked! Keep going for rewards"
3. **Personalized Playlists:** AI-driven "Your Daily Watch List" based on viewing history

Re-Engagement Campaigns:

1. **Win-Back Series:** Target 30-day inactive users with "We miss you - here's what's new"
2. **Seasonal Promotions:** "March Madness - All sports channels free this weekend"

Expected Impact: Reduce churn by 30%, increase multi-day users from 22% to 40%

Priority 5: Data-Driven Optimization (Ongoing)

Implement Tracking:

1. **Cohort Analysis:** Track Day 1, Day 7, Day 30 retention by acquisition channel
2. **Content Performance:** Monitor which channels drive retention vs. churn
3. **A/B Testing:** Test different onboarding flows, notification timing, content recommendations

Expected Impact: 15% improvement in conversion rates through continuous optimization

7. Financial Projections (Slide 19, ~1 minute)

90-Day Growth Targets

Conservative Scenario:

- Reduce single-day churn from 57% to 40% → +800 retained subscribers/month
- Increase multi-day conversion from 22% to 35% → +600 engaged subscribers/month
- Regional expansion → +500 new subscribers/month
- **Total:** +1,900 net new engaged subscribers in 90 days (+43% growth)

Optimistic Scenario:

- Aggressive onboarding + sports-led marketing → 60% growth
- **Total:** +2,600 engaged subscribers (+59% growth)

Revenue Impact (assuming \$10/month subscription):

- Conservative: +\$19,000 MRR in 90 days
- Optimistic: +\$26,000 MRR in 90 days

8. Next Steps & Timeline (Slide 20, ~1 minute)

Immediate Actions (Week 1-2)

- Launch Day 1 welcome email campaign
- Implement 48-hour re-engagement SMS
- Create sports event notification system

Short-Term (Month 1)

- Deploy personalized onboarding flow
- Launch "Cricket Fan Package" promotion
- Begin A/B testing on notification timing

Medium-Term (Month 2-3)

- Roll out regional expansion in Western/Eastern Cape
- Implement viewing streak gamification
- Launch family bundle packages

Success Metrics

- Day 2 return rate: 22% → 40%
- Multi-day users: 22% → 35%
- Average session length: 0.15 hrs → 0.25 hrs
- Channels per subscriber: 1.3 → 3.0

Conclusion

BrightTV has strong acquisition momentum but a critical retention problem. **78% of subscribers are disengaged**, watching only 1-2 days before churning. By fixing onboarding, leveraging sports content as a hook, and targeting high-engagement regions, we can convert casual viewers into loyal subscribers. The opportunity is clear: **multi-day users watch 5x more content** - our goal is to move the majority of subscribers into this category within 90 days.

The path to growth is retention, not just acquisition.
